New. York, March 8th 1858.

Professor Booth,
Philadelphia.

Dr Sir,

I am encouraged by the advice of my friends Messrs Henry Dubosq & Bro. of your city to ask you some information about the manufacture of Aluminium in Camden, N.J. My brother who resides in Paris, has heard that this metal is manufactured there at an excessively low price, say one dollar a ~~lb~~ oz the sodium at 13c. A note, says he, has been presented to that effect by W. J. Taylor Esq. at the "academy of natural sciences" of Philadelphia.

If I do not ask too much of your kindness, you will much oblige me by letting me know whether aluminium is at all manufactured in Camden, and in case it is whether there is not a great error in this marvellously low price. I hope

you will excuse and look favorably on
my request, I am,

Dear Sir,

Yours very respectfully

Victor Bishof
